

New Product Release

Available from GBU Electrotech

“Electrobricks” – the flexible electronic module

The Electrobrick is a line of compact electronic modules available with many different functions: (Converters, Optocouplers, Logical units, intelligent relays, Protection modules, DC/DC converters, AC/DC converters, Filters, Voltage and current sources etc.)

The "Electrobricks" are small *plug-and-play* enclosures that have the same shape as the common industrial relays. Electrobricks can be bought already installed on DIN rail sockets with screw terminal connections. Available accessories are labels, jumpers and LED indicators. The modules can also be bought without sockets, for soldering on PCB's

Featured Products:

EB-O12-0.5AAD – Current input Optocoupler; 0.5Amps; switching up to 250VAC/350VDC

EB-O3-24VDL – 24VDC Power Optocoupler with LED; switching 0-55VDC @ 5Amps
(Other input voltages available)
